Analysis

Why he's #1: The most complete draft in the league. 19/20 players contributing with zero duds. Only Shahbaz Ahmed (20 pts) qualifies as a miss. His mid-rounds (R6-12) delivered 1,184 pts -- the Phil Salt (R7, 231) and Anshul Kamboj (R10, 256) picks were masterstrokes. His late rounds are equally absurd -- Prasidh Krishna at R16 for 278 pts is the best late-round steal in the league. The only 'weakness' is that R4-R5 underperformed relative to draft position, but it didn't matter because literally everything else hit.

Key stat: Top 3 carry only 27% of total -- the most balanced roster in the league.

Analysis

The Bumrah gamble: Using an R1 pick on a bowler who returned only 36 pts is the single worst top-pick ROI in the league. But Sid recovered spectacularly with mid-round steals -- Jos Buttler (R8, 308) and Dhruv Jurel (R10, 329) are the 2nd and 3rd highest-scoring owned players overall. Late rounds were equally strong: Jofra Archer (R16, 244) and Sarfraz Khan (R19, 187) are gems. The 3 DNPs (Dhoni, Karun, Arjun) hurt, but the sheer ceiling of his mid-round picks keeps him in 2nd.

Key stat: R8+R10 alone (Buttler + Jurel = 637 pts) outscore most owners' entire top 5.

Analysis

Mid-round maestro: Kaushik's R6-R12 produced an insane 1,339 pts -- the highest mid-round haul. Rajat Patidar (R6, 328) and Heinrich Klaasen (R11, 337) are absolute blockbusters. But the draft has structural problems: de Kock (R3) and Ishant (R16) are complete zeroes, Boult (R4, 40 pts) is effectively dead, and the late rounds (R13-R20) generated only 463 pts -- the 2nd lowest. He's propped up by a magnificent R1-R2 (Kohli 290 + Sooryavanshi 320 = 610) and a ridiculous middle, but the roster lacks depth.

Key stat: Only 12 contributors -- the joint-fewest with JR, yet somehow 3rd overall.

Analysis

The most balanced drafter. Top 3 carry only 28% (joint-best with Venky). Every section of the draft delivered: early 761, mid 905, late 862. Jamie Overton at R19 (277 pts) is a filthy pick -- 4th highest-scoring player on the roster, picked in the penultimate round. Ruturaj as R1 (80 pts) is the main drag -- an R1 pick performing like a late-rounder. Devdutt Padikkal (R10, 240) is quietly one of the best picks in the league. Only 1 DNP (Will Jacks) keeps the roster clean. With 15 contributors and the most even distribution across rounds, Barath's roster is built for consistency.

Key stat: 14 players with 100+ pts -- the most in the league.

Analysis

MVP owner, depth problem. Aravinth owns the league's #1 overall scorer -- Ishan Kishan (R1, 367 pts). Mid-rounds were spectacular: Ravi Bishnoi (R12, 285), Angkrish Raghuvanshi (R9, 242), Tim David (R10, 209). But the R2 pick (Brevis, 32 pts) is a costly bust at that draft position, and 3 late DNPs (Holder, Ansari, Brar) are dead weight. If even 2 of those duds had delivered 80+ pts, Aravinth would be in the top 3. The squad's ceiling is high but the floor has holes.

Key stat: R1+R9+R12 alone = 894 pts (36% of total from just 3 picks).

#6 VIGNESH

Mid (R6-12)

Late (R13-20)

Analysis

Solid early, leaking late. R1-R3 all hit (Rahul, Pandya, Iyer = 564 pts), and Rohit at R6 (204) was a steal. Nitish Kumar Reddy (R11, 277) is a gem. But Harshal Patel at R5 (9 pts) is essentially a wasted early pick, and 3 late DNPs drag the roster down. The total of 2,067 puts Vignesh in 6th despite having 14 contributors -- the points just aren't high enough per player. No single player exceeds 277, meaning the roster lacks a true superstar scorer.

Key stat: Early rounds (631 pts) are the lowest of any owner -- R4+R5 combined only 67 pts.

Mid (R6-12)

Late (R13-20)

Analysis

The late-round catastrophe. JR's R1-R5 (793 pts) is actually decent -- Gill, SKY, Head all delivered. Mid-rounds had some steals (Dube R6, Sandeep R9). But R13-R20 produced a league-worst 126 pts -- with 7 players at zero. That's 7 wasted picks. Starc, Carse, Bethell, Omarzai -- high-profile names that simply haven't played. This isn't bad drafting on paper (these are genuine IPL players), but it's a depth disaster that leaves JR 1,442 pts behind the leader. Without a miracle run from his dormant picks, this is unrecoverable.

Key stat: 7 DNPs -- more than twice any other owner. Late rounds (R13-20) = 126 pts vs Venky's 969.
